

# Flexline Solutions by KNAPP

## Power for your processes

Need a quick-to-implement automation solution with low to medium complexity? Ready to automate your warehouse and looking for a strong partner with decades of experience in the planning and implementation of automated systems?

## In the fast lane with Flexline Solutions

We have the perfect solution to meet just these demands – the Flexline Solutions. The KNAPP group's Flexline Solutions are exclusive products centred around conveyor systems and PLC control systems. You benefit from our sophisticated portfolio of conveyor technologies suitable for transporting containers, trays, cartons and soft packaging, as well as diverse pallets. Our experts design a custom-made solution tailored to your demands that is built upon our many years of experience and consulting expertise. You enjoy efficient project implementation and professional consulting for the entire system lifecycle.

---

## Good reasons for choosing Flexline Solutions by KNAPP

- Ideal for those first steps towards automation
- Specially designed for applications with low to medium complexity
- All-in-one solutions with conveyor systems and PLC control systems
- Special machines and machines from third-party suppliers can be integrated
- Fast project lead times and offers are submitted rapidly
- Consulting expertise based on many years of experience
- Service and support for the entire lifecycle of a system

---

## Streamline and Powerline: A strong duo for your success

---

### Streamline

Load carriers	Containers, trays, cartons, soft packaging
Weight of transport object	Up to 50 kg
Outer dimension	180 x 180 mm to 850 x 850 mm
Type	Roller conveyor system, belt conveyor system
Bus system	Profibus AS-i Actuator-Sensor-Interface

---

### Powerline

Load carriers	Pallets EUR-pallets, Chep, plastic etc.
Weight of transport object	Up to 1,300 kg
Type	Roller conveyor system, chain conveyor system
Bus system	Profibus AS-i Actuator-Sensor-Interface

---

## Streamline and Powerline advantages at a glance

- **Smart control concept** with an AS-i bus system
- **Scalable, modular building blocks:** Solution can be precisely adapted to requirements and investment
- **Process innovation:** Quick installation and fast startup thanks to the high level of pre-assembly
- **Secure transport of goods**
- **Low-maintenance and reliable:** Trim spare parts management with parts commonality
- **Saving energy and costs:** Revolutionary accumulation stop concept; work stations are integrated directly in the accumulation conveyors without a drive unit
